

## TS Harvey

### SITUATION REPORT #1

**DATE OF REPORT: Tuesday, August 22, 2017, 14:00 Hours.**

#### **1. CURRENT SITUATION:**

##### **STATEWIDE CURRENT SITUATION:**

Remnants of Harvey remain disorganized. However conditions are favorable for development when the system moves over the Bay of Campeche tonight into tomorrow.

High chance a tropical depression will form over the southwest Gulf of Mexico Wednesday or Thursday.

Low confidence in track with potential landfall along the Texas coast early Friday.

Difficult to define exactly where impacts will occur. Plan for potential for heavy rain/flooding, tropical storm force winds, and coastal flooding Friday into Saturday.

Mainly a rain event for our area with the potential of > 7 inches of rain.

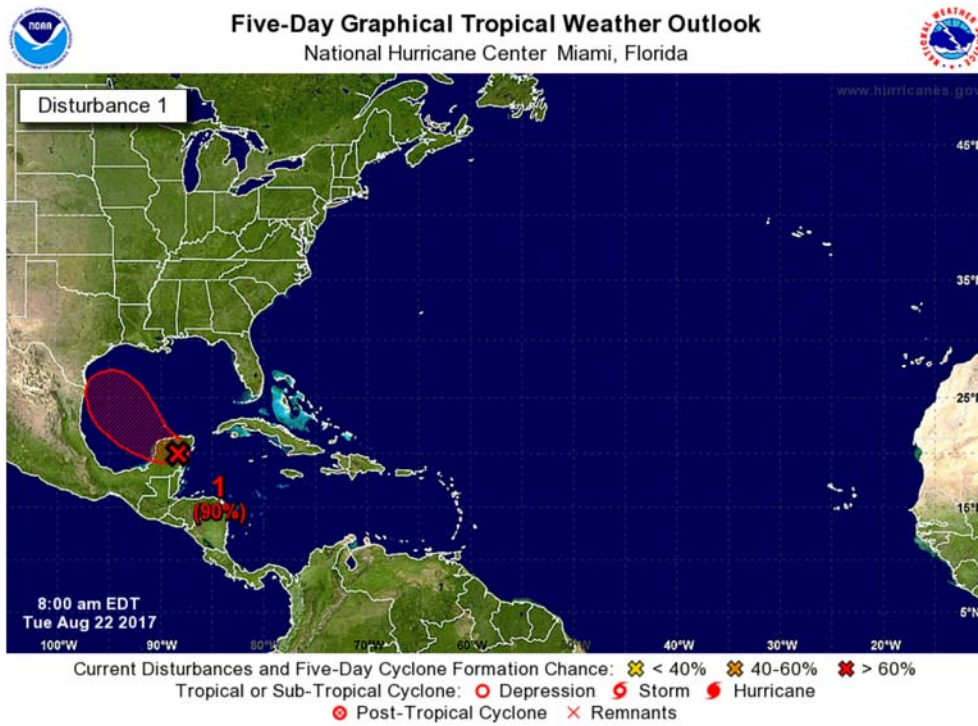

##### **From the National Hurricane Center**

Satellite images indicate that an area of low pressure over the Yucatan Peninsula, associated with the remnants of Harvey, has become better defined during the day. Environmental conditions are conducive for development when the system moves over the Bay of Campeche tonight, and a tropical depression is expected to form over the southwestern Gulf of Mexico on Wednesday or Thursday, and move in the general direction of the Texas coast on Friday. Interests in northeastern Mexico and along the Texas coast should monitor the progress of this system, as it could produce storm surge and tropical storm or hurricane force winds along portions of the Texas coast, and very heavy rainfall across portions of central and eastern Texas from Friday through the weekend. Please refer to products from your local National Weather Service office for more information on this system.

\* Formation chance through 48 hours...high...90 percent.

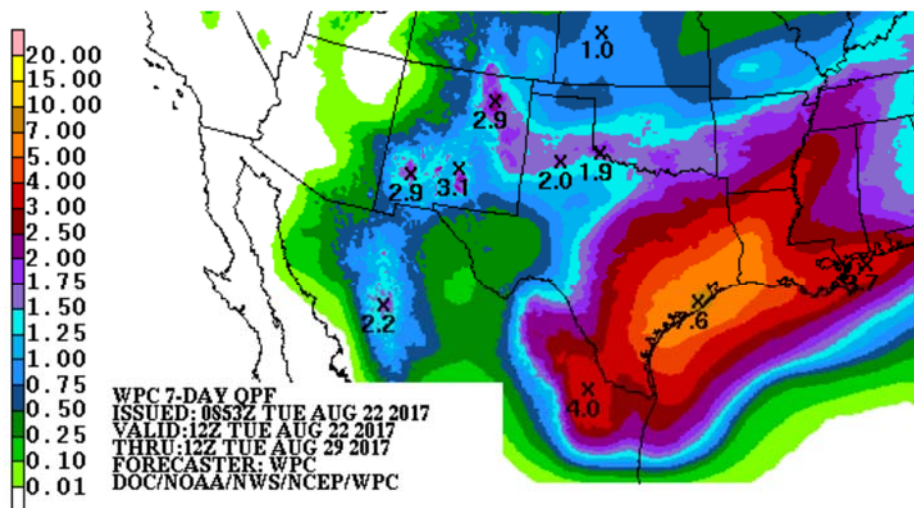

\* Formation chance through 5 days...high...near 100 percent.

#### **2. AREAS AFFECTED BY EVENT:**

Low confidence forecast at this time! Areas and amounts are likely to change in future forecasts.

Graphic depicts areal averages... locally higher amounts of double these amounts (or higher) are possible!

**3. LOCAL RESPONDING AGENCIES/ORGANIZATIONS, RESOURCES COMMITTED:**

Local Emergency Management Staff is monitoring the situation and will issue additional updates as the situation changes.

**4. STATE OF TEXAS ACTIONS:**

- Texas Department of Public Safety is monitoring the situation.

**5. Other Information:**

Conference Calls are at 10:10 AM (Houston NWS) 1200 (SOC) to monitor the developments of this storm.

**6. COMMENTS:** The Community Emergency Operations Center staff is monitoring the situation and will issue additional reports each day as necessary. **The CEOC is at Level IV (Normal Readiness Conditions).**
